

# Gazi Aman Khan

## Data Analyst | AI & Analytics

✉ gazinghaan15@gmail.com ☎ 9521857892 📍 Udaipur 🌐 [Gazi Aman Khan](#) 🔄 [Gazi Aman Khan](#)

### PROFILE

Data Analyst with hands-on experience in Python, SQL, and Power BI, analyzing complex datasets and building data-driven solutions. Skilled in data cleaning, EDA, KPI evaluation, and predictive modeling across multiple real-world domains.

### EDUCATION

|                                                                              |                        |
|------------------------------------------------------------------------------|------------------------|
| <b>B.Tech in Computer Science</b> , Techno India NJR Institute of Technology | 2021 – 2025<br>Udaipur |
| <b>Senior Secondary(XII), CBSE</b> , Central Academy School                  | 2019 – 2020<br>Udaipur |

### SKILLS

**Languages & Tool** — Python (Scikit-learn, Pandas, NumPy, Matplotlib), SQL, Power BI, Excel, Jupyter Notebook, GenAI.

**Data Science & Analytics** — Data Cleaning, Feature Engineering, KPI Analysis, ETL, EDA, Predictive Modeling.

**AI & ML Foundations** — Statistics(Descriptive), Machine Learning Fundamentals, NLP Basics.

**Visualization & Reporting** — Power Bi Dashboards, DAX(Basics), Power Query.

### PROJECTS

#### Retail Performance Analysis | SQL (CTES, Window Functions) 🔄

Problem-Analyze branch-level revenue and customer behavior to identify high-performing outlets.

- Executed advanced SQL analyses to evaluate revenue, customer patterns, and branch KPIs, identifying top 37% revenue-contributing outlets.
- Optimized query execution by 30%, improving reporting efficiency.

#### **Operational Performance Dashboard**, Power BI (DAX, Power Query)

Problem: Monitor flight delays and operational KPIs to identify inefficiencies.

- Built a multi-page dashboard analyzing delays, routes, and KPIs using 100k+ flight records, uncovered 15% delay hotspots.
- Implemented RLS and a clean data model to improve accuracy and secure role-based access.

#### Electric Vehicles Market Analysis | Python (EDA, Statistical Analysis) 🔄

Problem-Identify factors influencing EV adoption and pricing across multiple vehicle segments.

- Analyzed multi-year EV data to identify key adoption and pricing drivers; uncovered 22% performance variance across segments.
- Built a recommendation model improving price-feature alignment by 18%, enabling data-backed product insights.

#### Pricing & Churn Prediction | Machine Learning (Scikit-learn) 🔄

Problem: Understand factors influencing pricing and customer churn in a rental marketplace

- Developed churn and pricing models achieving 87% accuracy and 0.42 RMSE, with 12% improved performance through tuning.
- Identified key retention and pricing drivers using statistical and feature importance analysis.

### CERTIFICATES

AI Fluency for Students - Anthropic

Data Science Training - Internshala Trainings

Data Driven- Machine Learning Training

NLP Essentials\_ Applications to Real-World Problems Training

Deep Learning Data-Intensive Training
